Long lasting decking and balustrade for your home

DEKBOARD: A BEAUTIFUL DECKING AND BALUSTRADE SYSTEM, SPECIALLY DESIGNED TO REPLACE AND OUT- PERFORM TRADITIONAL TIMBER DECKING

DekBoard is made to look like high quality timber and do that without the need for the time consuming and costly maintenance that timber always needs.

DekBoard is the durable alternative to timber that gives you a secure foothold in the wet or dry. It doesn't encourage the growth of slippery lichen and it is so easy to clean.

With DekBoard you can create a safe, secure and long-lasting outdoor space for rest, for play and for getting together.

It's a decking and balustrade system that will increase the usable area around your home, where you can set up patio furniture or a small forest of pot plants, sunbathe or throw a party; or where you just take off your boots before going indoors.

ROBUST

- Strong construction
- Wear & impact resistant
- Will not warp like timber

SAFETY

- Low slip surface in wet or dry conditions
- Will not crack or splinter
- Will carry high loads
- No sharp edges or splinters

LOW MAINTENANCE

- Easily cleaned
- Unlike timber it won't promote mould growth
- Doesn't need treating, varnishing or painting

ENVIRONMENTAL

- 100% Recyclable
- No paints or preservatives required
- Manufactured under ISO14001 Environmental Management Certification.

LONG LIFE

- Will not rot
- Does not require maintenance
- 20 year performance guarantee
- Outlasts timber

PRODUCT TESTING

- Fire resistance- Tested to BS 476: Part 7
- Slip Resistance – Tested to BS7976 -2
- Static Load capability – Tested to BS6399 Pt1

20 YEAR
GUARANTEE

**QUALITY &
GUARANTEE:**
DEKBOARD IS MADE IN THE UK
UNDER STRICT QUALITY,
ENVIRONMENTAL AND HEALTH AND SAFETY
MANAGEMENT SYSTEMS.

All our decking boards are regularly checked for size, shape and the quality of the finish. They are also tested for fire resistance, slip resistance, wear resistance and load carrying capacity. We are so confident about the quality of our DekBoard that we guarantee it's structural performance for 20 years.

PROMENADE DECKING
The ultimate combination of PVC toughness with the beauty of a WPC (wood plastic composite) finish.

ARENA DECKING
A great range of practical PVC decking boards with a traditional woodgrain pattern.

HORIZON BALUSTRADE
A traditional balustrade system that will complement Promenade or Arena decks.

PROMENADE

THE ULTIMATE COMBINATION OF A TOUGH PVC BOARD WITH THE BEAUTY OF A WPC - WOOD PLASTIC COMPOSITE - FINISH

WPC is a composite material, half of which is PVC and half timber sawdust, that is ethically sourced from environmentally certified providers. This material feels comfortable to the touch, an effect that is enhanced by the timber grain that we emboss onto our Promenade boards.

This smooth feel makes Promenade great for children to play on in the knowledge that they won't get splinters or scratch themselves on raised edges.

Because WPC contains timber the colour will fade predictably in the first few weeks to a great looking natural finish – but that's where the similarities with timber end.

Unlike timber your deck won't encourage the growth of unsightly lichen that is so hard to remove and is so dangerous on wooden decks.

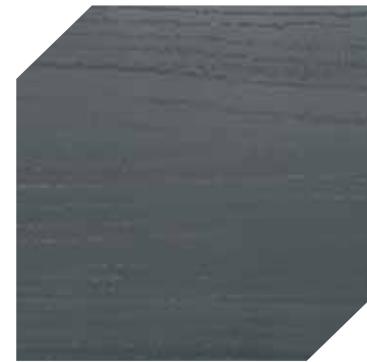

The grain effect on our boards will provide good grip at all times, so your deck will always be a safe place to stand or walk come rain or shine.

And you won't get splinters from your Promenade deck. It won't twist or deform, it will be quiet to walk on and best of all it will last for years - and you won't have to treat it once.

ARENA

A GREAT RANGE OF VERY PRACTICAL PVC DECKING BOARDS WITH A TRADITIONAL WOODGRAIN PATTERN

DekBoard Arena boards are practical, tough and durable. If you want a decking area that has to take on all comers then Arena is a great choice.

These PVC boards are durable enough for kids to play on during the day and tough enough for adults to party on at night.

The board's surface is embossed for good slip resistance and is easy to clean, whether it's kids or adults you're clearing up after.

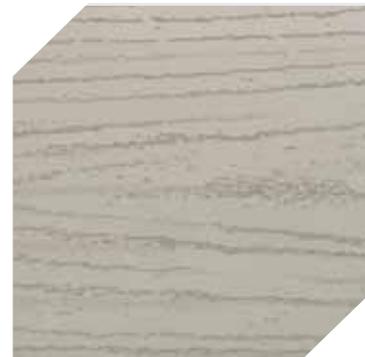

Arena has a great range of contemporary and neutral colours that go well with most settings and complement the Horizon balustrade range.

HORIZON

A TRADITIONAL BALUSTRADE SYSTEM THAT WILL BEAUTIFULLY COMPLEMENT YOUR PROMENADE OR ARENA DECK

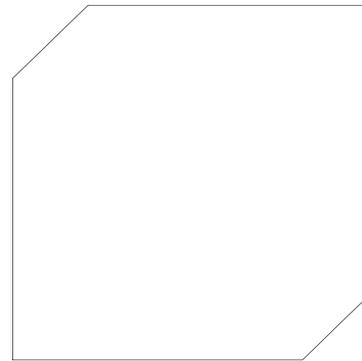

It is important to have a balustrade if you want to keep children safe and avoid falls - and one is absolutely essential if you want to lean on something to admire the sunset while taking some refreshment.

DekBoard Horizon balustrades can be made up in a number of ways using traditional top and bottom rails with pickets in-between or with glass panels instead.

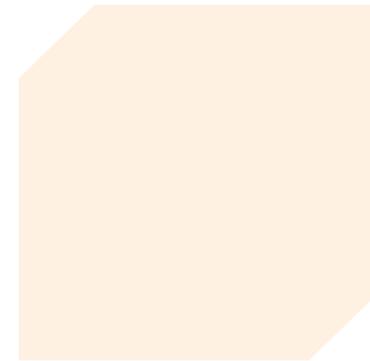

The hand rail and bottom rails can be reinforced with metal inserts that make them more rigid where this is required.

The pickets are cut to height to suit the installation and they can be set square with the rails or in an attractive diamond pattern along the rails.

Glass panels are becoming popular these days and the Horizon range provides for clear and tinted toughened glass versions which can be mounted to your deck in a number of ways

ACCESSORIES

THE DECKBOARD SYSTEM HAS A RANGE OF ACCESSORIES THAT CAN BE USED TO BUILD CHARACTER AND INTEREST INTO ANY INSTALLATION

For many people a deck is a deck - and that's great, but a deck can be so much more, with steps, access ramps and lockable gates to protect entrances.

An elevated deck with balustrade is a great focal point in a garden. Decks are great around ponds, swimming pools, along walkways and as the base for a shaded area in your garden.

Picket Balustrade Square/diamond

The 1.25" picket is the most popular option for the balustrade infill. The pickets can be set square with the handrail or in a diamond format.

Glass

Glass has become very popular as an infill. There are a number of configurations available – talk to your installer about the options.

Gates

We recommend that a gate is fitted to all raised deck platforms. With self-closing hinges and lockable latches these gates provide a safe enclosure for children and animals, and a deterrent to others.

Ramps/Access Solutions

Stairs and ramps can be readily constructed using the various elements of the DekBoard system. Your installer will take account of the incline, length and loading of any ramp when designing your system.
